A New Space That Holds Every Story in the World

“A New Standard of Space, Connecting Reality and the Digital World through spaceAile 3D Space”

“Redefining the Way We Experience Spaces and Expanding Possibilities.”

spaceAile is a 3D digital platform that opens instantly on all devices (PC, mobile, tablet, etc.) without any app installation. It resolves the core limitations of online experiences—spatial perception, sense of presence, and decision confidence—enabling online experiences alone to naturally lead to real visits and purchases through a new Connected O2O (Online to Offline) space solution.

Core Values

Double Impact

Virtual experiences that lead to real-world visits and purchasing decisions, maximizing promotional impact.

Unlimited Experience

Free implementation of staging, scale, and special effects that are impossible in physical spaces.

Forever Lasting

Zero dismantling costs and permanent preservation of spaces as long-term digital assets for brands and individuals.

Key Features

- High-quality digital spaces recreated based on real environments
- Operation of fully online exhibitions and events without physical spaces
- Automatic multilingual audio docent support for artists and administrators
- One-click auto-tour function for video-like viewing
- Instant access via a single link on PC and mobile devices (no installation required)
- Creative staging, lighting, and interactions impossible in physical reality
- Integration of online events such as coupons, stamps, and treasure hunts
- Connection to purchase, reservation pages, and external links

Another Expansion Service of spaceAile — stageAile Custom

A real-time 3D simulation service dedicated to high-value, high-involvement services. It transforms the common anxiety customers feel before making significant decisions—when they cannot fully visualize a space—into confidence within just five seconds.

Core Principles

- Provision of high-quality, curated style packages
- Instant full-space style changes within five seconds with a single click
- One-stop connection from auto-saving and sharing to consultation booking

stageAile Custom simultaneously enhances the quality of consultations and accelerates customer decision-making, becoming an essential new tool for brands.

Use Cases

- Art Galleries: Permanent online exhibitions for individual and group shows, global viewing access
- Pop-up & Brand Experience Spaces: Preservation of even short-term installations with bold creative staging
- Showrooms & Virtual Stores: 24/7 global customer engagement for fashion, beauty, and furniture brands
- Real Estate & Interior Design: Revisit model homes and commercial spaces even after dismantling
- Community & Events: Zero venue cost with simultaneous global invitations
- Wedding Archiving: Long-term preservation and easy sharing of wedding stories
- Personal Archives: Transform ordinary photo storage into a personal immersive museum

These are representative fields where spaceAile delivers the greatest impact. Industries that value spatial documentation, promotion, and interaction benefit especially from spaceAile's accessibility, continuity, and immersive spatial experience.

Top 5 Priority Industries for the Korean Market (2025)

Top 5 Priority Industries by Application (Korea, 2025)

Rank	Industry	Representative Use Cases	Number of Style Variations (Est.)	Expected Impact
1	Hotel & Resort Wedding Venues	Shilla Dynasty Hall & Yeongbin Hall, Lotte Crystal Ballroom	4–6	Faster decision-making
2	Private & House Wedding Venues	The Raum, Le Ciel, Venue G	3–5	Higher consultation conversion
3	Premium Funeral Halls	VIP halls at Asan Medical Center, Samsung Medical Center	4	Increased customer satisfaction
4	Premium First-Birthday & Family Events	Sheraton Walkerhill, Paradise City	4	Increased customer satisfaction
5	VIP Postnatal Care Centers	Severance Postpartum Suites, Rivée	3–4	Improved spatial understanding

The Top 5 industries listed below represent sectors where **stageAile** is expected to deliver particularly strong impact in the Korean market by 2025.

What these industries have in common is that **spatial structure, atmosphere, and style directly influence customer decision-making**.

For this reason, the adoption of **digital spatial experiences that allow customers to preview and experience spaces in advance** delivers especially high value in these sectors.

stageAile provides the following features tailored to industry-specific needs:

- * Industry-specific curated style packages
- * Instantly immersive, realistic spatial experiences
- * Seamless O2O conversion structures that connect quickly and easily to consultations

Through these features, **customer understanding, immersion, and decision confidence are significantly improved**.

Offline spaces provide strong direct experiences, but they are limited by constraints such as time, distance, and reservation availability.

Traditional online experiences offer accessibility, but struggle to effectively convey spatial presence, realism, and decision confidence—making it difficult to convert interest into actual visits or purchases.

stageAile addresses both limitations simultaneously by offering a new spatial experience that bridges the strengths of offline and online environments.

Core Capabilities Provided by stageAile

- High-quality digital spaces based on real environments
- Expanded staging, lighting, and interaction beyond physical limitations
- Hybrid experiences that support comparison, validation, and decision-making anywhere
- Permanent digital space assets usable even after physical events end
- Connected O2O structures that continuously link brands and customers

“Any space, for any purpose, delivered as the most complete experience across both online and offline environments.”

Customers fully experience spaces before visiting, while brands continue to leverage even completed spaces—dramatically increasing conversion efficiency across consultations, sales, and marketing.

One-line Summary

- Not a dismantled space, but a space that lives on
- A space that opens imagined experiences as real
- A space that transforms hesitation into confidence within five seconds

stageAile sets the standard for new spatial experiences.

Start a better spatial experience now.
